

INDUSTRIAL AUTOMATION

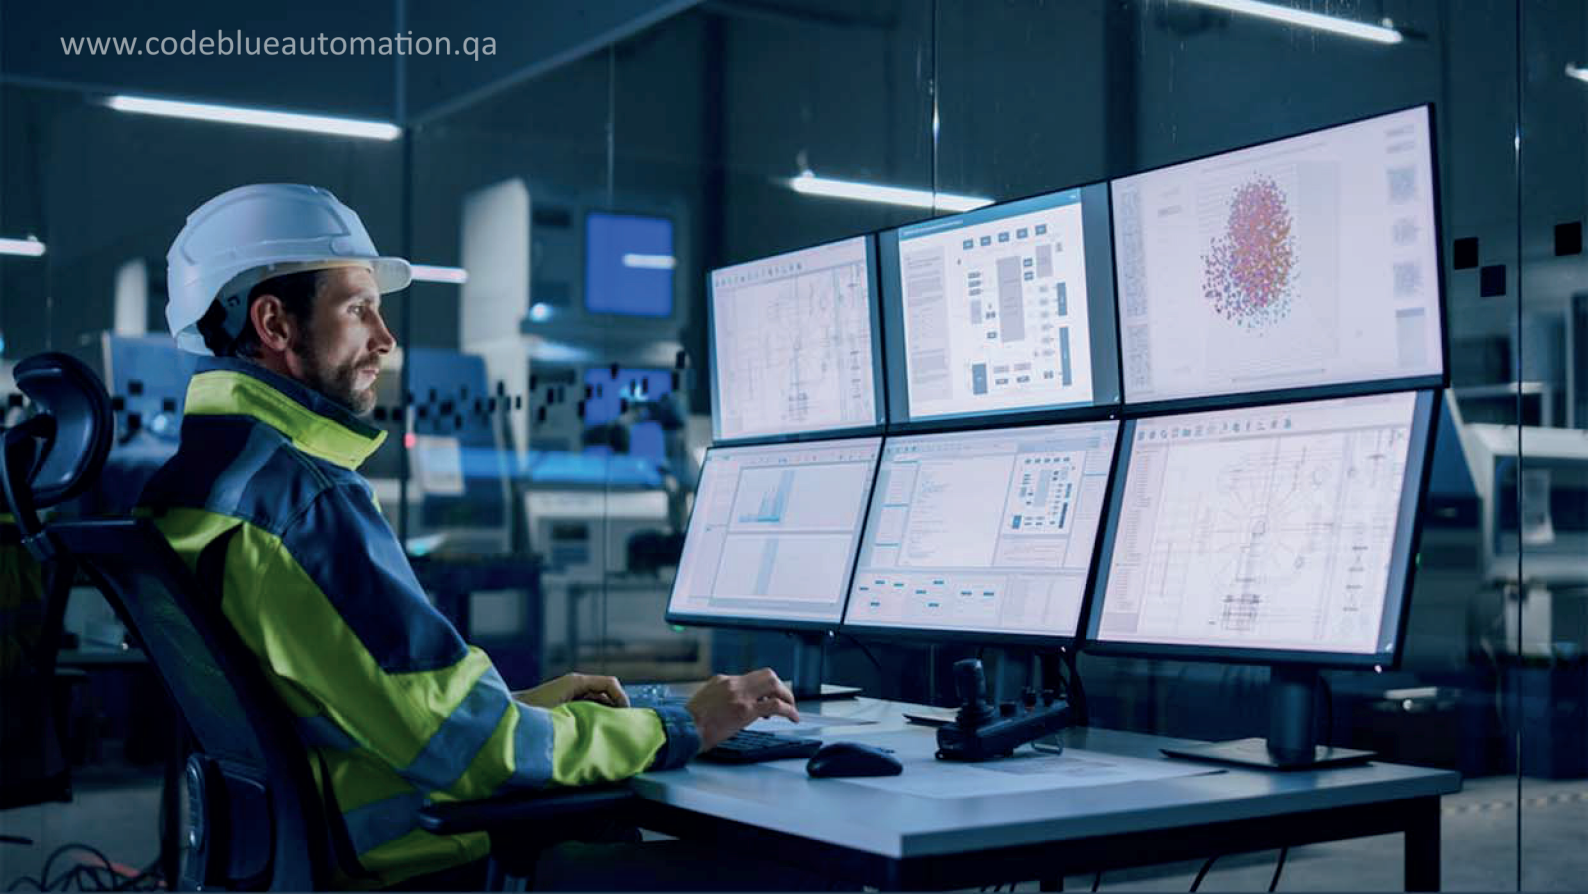

DESIGN AND DETAILED ENGINEERING

Innovations  
for a digital  
transformation

INDUSTRY4.0

## AT CODE BLUE,

We develop automation solutions to manage energy and process in ways that are safe, reliable, efficient, and sustainable which can be monitored and controlled from your plant and from remote locations. We are focused towards the digital transformation of energy management and automation with a strong commitment to sustainable development.

We work on Automation projects, Plant migration and Consulting automation solutions at competing costs and reliable quality. We also provide on-time service support to minimize the downtime of your machines, with a wide range of automation products of major brands. We strive to be the best at everything we do and to provide our customers with innovative solutions to meet their needs.

## IOT Edge devices & SCADA

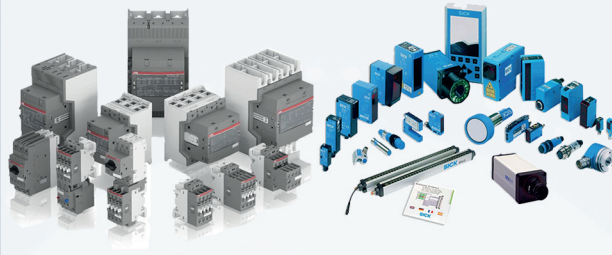

## PLC Systems

## HMI

## Sensors & Switch Gears

## MS & SS Enclosures

## VFD & Servo Systems

## Industrial Automation Projects & Solutions

Industrial Automation Solutions that are the best in class across all major automation technology platforms. Our expertise spans the spectrum, including Electrical and Instrumentation, PLC, HMI and SCADA for machines and process control.

## IOT & Energy Management

Intelligence to devices for collecting & utilizing data generated for energy & utility optimization.

## Control Panel Manufacturing

Our team manufacture standard and customised panels for VFD starter, MCC, PLC control panels, RTU panels

## Service Support

With quick response & competent support, our team resolves technical issues & prevents system downtime.

## Technical consulting & Design

Our design approach is understanding the nature of the control processes and designing the best control system.

# Digital transformation for sustainable development

We can help you at each point, when it comes to automation.

Industrial Automation Solutions | Technical training  
IIOT & Energy management | Preventive maintenance  
Technical Consultancy | Migration and modernization  
Start-up and commissioning | Site technical support  
Electrical Engineering & Design | Software License  
Remote technical support
